I ship AI products that make money. For the last three years I have been the lead engineer of a live AI SaaS and have built a profitable product of my own. 13 years of production software on TypeScript, React, Node and AWS. I own the whole product: architecture, AI pipelines, billing, infrastructure and the consequences in production.

SELECTED WORK

LIVEDAB - Lead Engineer | Dec 2023 - present | app.livedab.com
Multi-tenant SaaS for AI photo and video campaigns with a built-in CRM, used by event organizers and brands in Germany. I own the platform end to end: 5,300+ commits, about seven times the next contributor.
- Layer-based canvas editor (Konva, XState) with per-layer AI chains: background removal, video matting, face swap, image-to-video over Replicate, Google GenAI and OpenAI.
- Server-side video rendering with Remotion on AWS Lambda, orchestrated by a durable, reload-safe workflow.
- Multi-tenant CRM with dynamic custom fields, six-level roles (CASL), audit log, public forms and event management.
- Embeddable realtime widgets (Shadow DOM, Mercure SSE) that drop a live photo wall into any site with two lines of code.
- Playwright e2e suite with a custom results viewer, versioned Mongo migrations, Git Flow with conventional commits.
- Stack: Next.js 16, React 19, TypeScript, Tailwind 4, MongoDB, Auth0, AWS S3/SQS/Lambda, Vercel, Zod, i18next.

mosfoto.com - Founder, solo | May 2026 - present
Paid tool that turns any photo into a compliant residence-card photo for Poland's MOS portal. Profitable.
- BiRefNet background removal and BiSeNet face parsing on Replicate, then deterministic server-side framing with versioned results.
- Stripe pay-per-result, direct browser uploads to Vercel Blob, Vercel BotID on every write route, hourly cleanup cron, PostHog analytics.

Personalized AI sales videos at scale | 2026
One command produces a per-prospect demo video: Playwright records the prospect's site, Claude writes a localized call script constrained by the production voice agent's spec, ElevenLabs v3 voices both sides, Remotion renders the MP4.

Construction niche research pipeline | 2026
Mapped 97,000 construction workflows and scored 39,000 of them with GPT-4o, Perplexity search and Zod-validated structured outputs. Resumable multi-day runs; weeks of research cut to hours.

EXPERIENCE

Independent consultant (Upwork) | Jul 2023 - present
Top Rated Plus, 100% Job Success, $200K+ earned across 18 contracts. Average engagement 180+ hours, longest 1,300+ hours and still active.
- Fintech web app with multi-step loan flows: Next.js, XState, 392 hours.
- Fintech platform on Azure: senior full-stack, 307 hours.
- Plixo Play, AI-enhanced presentations: Next.js, Azure OpenAI, Cosmos DB.
- CRM MVP: React, TypeScript, NestJS, fixed price, 5.0 rating.
- Chrome extensions with LLM integration (LinkedIn DOM automation, ChatGPT over user data).

- Production-readiness audits of AI-built codebases.

Etalonix - Founder | Jan 2026 - present
Boutique engineering practice: audits and production hardening of AI-built SaaS, ElevenLabs voice agents with webhook-driven lead portals on Supabase.

Genvision - Full Stack Engineer, part-time | Apr 2025 - present

Ovdal ApS - Senior Full-Stack Developer & Data Analyst | Jul 2018 - Dec 2022
Lviv. Core engineer for a Danish product company. Owned features from MongoDB/PostgreSQL schema to AWS deployment and monitoring; evolved the same production systems through years of migrations. Travel planning, home-cleaning analytics and cloud analytics products.

CobbleWeb - Full-Stack Developer | Nov 2017 - Mar 2018
London. Real-time ticket exchange platform fanpass.co.uk, React and Node.js.

Sunbay B.V. - Backend Developer | Sep 2015 - Oct 2017
Lviv. Node.js and Express services; e-commerce backend modernization; pharmacy management tools.

Earlier | 2013 - 2015
Full-stack roles at SEVEN, Rumedia Group and Sunduk, Ukraine. E-commerce sites, PSD to web.

SKILLS

Frontend: TypeScript, React, Next.js, Tailwind CSS, shadcn/ui, TanStack Query, XState, Konva, Remotion, Angular
Backend: Node.js, NestJS, Express, Python (FastAPI), REST, GraphQL, Zod
AI: OpenAI, Anthropic, Gemini, Azure OpenAI, Replicate, ElevenLabs, Perplexity API, RAG, agents, structured outputs
Data: PostgreSQL/PostGIS, MongoDB, Supabase, Azure Cosmos DB, Redis
Cloud: AWS (Lambda, S3, SQS), Vercel, Azure, GCP, Docker, GitHub Actions
Product: Stripe, Auth0, PostHog, Playwright, Chrome extensions, SEO

LANGUAGES & DETAILS

English (fluent), Ukrainian (native), Polish (conversational).
Ukrainian citizen with a Polish residence card: no visa sponsorship needed.
Available remote or on-site in Poland, B2B or full-time.
